

Our world-class gigafactories are designed to be powered by clean sources of electricity, including purpose-built renewable energy plants. We are embedding circular economy processes throughout our value chain to reuse, recycle and recover materials back into production.

Agratas Energy Storage Solutions is planning to set up two battery gigafactories with an investment of over USD one billion in the first year in the United Kingdom (UK) and Gujarat, India. Agratas Energy Storage Solutions, a wholly-owned subsidiary of Tata Sons, will receive sops from both the governments, and the company is likely to raise ...

Tata Group is considering spinning off its battery business, Agratas Energy Storage Solutions Pvt, as an independent unit to raise funds and potentially go public in Mumbai. Agratas designs and makes batteries for the automobile and energy sectors, with factories in ...

Agratas also plans to create batteries for other applications, including two-wheelers and commercial vehicles, as well as commercial energy storage solutions. The news follows an announcement made by Tata Group last year that it would establish Agratas, a new subsidiary, and that the UK would be home to the company's first gigafactory outside ...

Stantec, a global leader in sustainable design and engineering, has been selected to provide integrated design services for Agratas, Tata Group's global battery business, who are building a battery cell manufacturing facility ...

We will serve customers in the mobility and energy storage sectors, supplying best-in-class battery cells that meet the highest standards of quality, performance and sustainability. We will also support our customers with the integration of ...

Tata chairman Natarajan Chandrasekaran said last July the gigafactory would start producing cells in 2026 following a "rapid ramp-up phase" -- supplying batteries for EVs and battery storage systems in the UK and mainland Europe.

Agratas also plans to create batteries for two-wheeler and commercial vehicles, as well as commercial energy storage solutions. The Agratas gigafactory, which will provide batteries for JLR, will be located at the Gravity Smart Campus in Somerset

We will serve customers in the mobility and energy storage sectors, supplying best-in-class battery cells that meet the highest standards of quality, performance and sustainability. We will also support our customers with

the integration of battery cells into their applications, including modules and packs.

Tata chairman Natarajan Chandrasekaran said last July the gigafactory would start producing cells in 2026 following a "rapid ramp-up phase" -- supplying batteries for EVs and battery storage systems in the UK and ...

Flexible manufacturing capacity will deliver electric mobility and renewable energy storage solutions for customers in UK and Europe; JLR will be an anchor customer with production starting in 2026

Agratas, Tata Group's global battery business, today announced that a battery manufacturing facility will be built by the company in the United Kingdom. In this regard, it announced the location of the facility that will be built in ...

Stantec, a global leader in sustainable design and engineering, has been selected to provide integrated design services for Agratas, Tata Group's global battery business, who are building a battery cell manufacturing facility on the Gravity Smart Campus in the United Kingdom (UK). The new advanced manufacturing facility, comprising three ...
