

Does the UK government want the solar industry to grow?

The government has already signed off on more than 1 GW of new solar capacity. It's been a whirlwind two weeks for the UK solar industry. Chris Hewett, chief executive of Solar Energy UK, told pv magazine he believes the new UK government "unambiguously" wants the industry to grow, a first for the trade association.

Will a UK government back solar?

Signs of a UK government that's prepared to back solar have emerged within a fortnight of the Labour Party securing victory in the General Election. The government has already signed off on more than 1 GW of new solar capacity. It's been a whirlwind two weeks for the UK solar industry.

How many solar installations are there in the UK?

Provisionally, as of the end of January 2019 there was 13,123 MW installed UK solar capacity across 979,983 installations. This is an increase of 323 MW in slightly more than a year. A new record peak generation from photovoltaics was set at 11.2 GW on 02 June 2024.

Does the UK get a lot of solar power?

While the sunniest parts of the UK receive much less solar radiation than the sunniest parts of Europe, the country's insolation in the south is comparable with that of central European countries, including Germany, which generates about 10.7% of its electricity from solar power.

Where can I buy solar panels in the UK?

At the end of September 2013, retailer IKEA announced that solar panel packages for houses would be sold at 17 UK stores by July 2014. The decision followed a successful pilot project at their Thurrock store, during which one system was sold almost every day. The panels were manufactured by the Chinese company Hanergy.

What is the UK's first solar farm?

The first large solar farm in the United Kingdom, a 32 MW solar farm, began construction in November 2012 in Leicestershire, between the runways of the former military airfield, Wymeswold.
