

### What is VDL energy systems?

VDL Energy Systems develops applications that make it possible to convert hydrogen into electrical energy, using state-of-the-art PEM fuel cell technology. in a range from 50 to >250 KW power supply. VDL Energy Systems balances rotors of compressors and turbines at high speeds according to the latest protocols and ISO standards.

### What does VDL Groep do?

At VDL Groep, we strive to leave a more pristine planet. We are actively investing in energy solutions and expanding our impact. We focus on energy storage and transportation, and believe hydrogen will become important. We develop better mobility with electric batteries and our super-battery offers a green alternative.

### How does VDL's battery technology work?

The vehicles will be powered by VDL's proprietary battery technology, which allows for rapid charging and long-term energy storage without needing to return to a charging station. This battery is also designed to be energy-efficient to reduce the energy used in each journey.

### What role does VDL energy systems play in the energy transition?

VDL Energy Systems will also play a role in the energy transition from fossil fuels to sustainable energy sources. In 2018, VDL Groep invested EUR119 million in business premises, machinery and other operating assets. By the end of 2018, VDL Groep had a total operating area of almost 1,400,000 m<sup>2</sup>.

### What is VDL's energy mix?

VDL is proud to be at the forefront of this initiative and looks forward to seeing the positive impact it will have on the people of Curacao as they move towards a more sustainable future. Currently, our energy mix consists of approximately 20% electricity and 80% natural gas or liquid fossil fuels.

### Who is VDL Groep & Scholl energy control?

Managing Director: Rob van Gennip / Theo Toussaint Hoevenweg 1 5652 AW Eindhoven, The Netherlands  
T: +31 (0)40 292 50 00 info@v-storage.com This joint venture between VDL Groep and Scholl Energy Control is aimed at innovations in the field of sustainable energy storage.

VDL Energy - Experts in Sanitair, Verwarming, Zonnepanelen, Onderhoud en Airco. Ontdek onze duurzame oplossingen voor uw huis of bedrijf. Verbeter comfort, bespaar energie en investeer in een groenere toekomst vandaag.

VDL Energy Systems | 2.234 Follower:innen auf LinkedIn. VDL Energy Systems contributes to making the energy system more sustainable. We do this by developing Smart, Scalable and Reliable applications with the focus on energy storage and conversion. The products developed by VDL Energy Systems for this are: lithium-ion energy storage systems, hydrogen fuel cell ...

VDL Energy Systems develops clean energy storage systems based on state of the art lithium-ion battery technology and software, in a range from 60 kWh to >1000 kWh. Our applications are plug/play, scalable, smart and versatile under the name of Electrical Power Units (e-PU). The systems are suitable for various application as:

Production Systems VDL Steelweld is known as an innovative system integrator in industrial automation for more than 50 years. The core team at VDL Pinnacle, has had the opportunity of working for VDL Steelweld's global projects, be it in the Netherlands, United Kingdom, United States of America or Slovakia, thereby learning a lot in the process.

The 43 batteries from the VDL electric buses operated by Transdev Netherlands, with a total storage capacity of 7.5 megawatts, will be coupled into one battery at the RWE power plant in ...
