Our manufacturing engineers, quality control personnel, supply team and among others, together strive to streamline the factory lines and overall operation and to ...

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For this reason, ...

Residents of Marilog in the city's 3rd District, were among those who first tried the benefits of solar energy after the United States-funded Alliance for Mindanao Off-Grid Renewable Energy or AMORE, through the Yamog Renewable Energy Development Corporation, introduced solar power to the area sometime in 2005.
