

Who is uron energy?

URON Energy has developed projects in several countries and are well equipped with the experience and skills to create a global presence. URON envisions a future where clean energy technologies are accessible to all, with little or no upfront costs.

What makes uron a good company?

At URON, we are driven by a deep commitment to environmental responsibility. Our mission is to create a positive impact on the planet by providing sustainable and innovative solar solutions to homes and businesses. With a focus on renewable energy, we strive to empower individuals and organizations to transition towards clean, solar power.

What is the cost of electricity in Aruba?

The energy landscape of Aruba, an autonomous member of the Kingdom of the Netherlands located off the coast of Venezuela, is outlined in this profile. Aruba's utility rates are approximately \$0.28 per kilowatt-hour (kWh) (below the Caribbean regional average of \$0.33/kWh).

Why should you choose uron energy?

The aim is to give our clients the world's cleanest green energy electrons on time and the budget they can be proud of. URON Energy has developed projects in several countries and are well equipped with the experience and skills to create a global presence.

How much energy does Aruba consume annually?

Aruba has an annual consumption of 990 gigawatt-hours (GWh). Currently, about 13% of its generation comes from a 30-MW wind project and 0.9% comes from waste-to-energy (WTE) biogas. An additional renewable capacity of 34 MW is planned or in progress. Aruba's installed generation capacity is 230 megawatts (MW) with an average load of 100 MW.

How many MW will Aruba's biogas plant use?

Aruba's biogas plant is hoping to add 3 MW to 6 MW of capacity with a goal of using 70% of household waste. Production data for a 3.5-MW airport solar project are not yet available, and an additional 6 MW of solar capacity is planned for the residential and commercial sectors.

Once the connection to the DLMS meter is established, the built-in browser provides automatic discovery of all its datapoints, that can be easily added to your data model by utilizing the drag-and-drop functionality. This provides a simple and effective way to get real-time values (Active Energy, Active Power, Reactive Energy, Reactive Power, Voltage, Current, Power Factor, etc.) ...
