Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT,May 21,2024 -- The World Bank Group,Abu Dhabi Future Energy Company PJSC (Masdar),and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plantwith a 63-MW battery energy storage system (BESS).

How much energy does Uzbekistan generate in 2024?

Solar and wind power plants in Uzbekistan generated 4 billion kWh of electricity Uzbekistan ranks among the fastest growing economies in Europe and Central Asia in 2024 -- World Bank UNDP expands collaboration with regional monocenters in Uzbekistan on green energy Turkish investors to build a photovoltaic plant in Ferghana region

Who collects energy statistics in Uzbekistan?

The State Committee of the Republic of Uzbekistan on Statisticsis the official authority collecting energy statistics. It will play an important role in the future in collecting data on off-grid solar photovoltaics and solar heat use in households.

Is Uzbekistan a renewable country?

Looking at renewables by technology, almost all renewable energy in Uzbekistan is generated by hydropower (6.5 TWh, or 10.2% of overall generation in 2019), while wind and solar power are negligible to date. Uzbekistan's power system is part of the Central Asia Power Grid with Kazakhstan, Kyrgyzstan, Tajikistan and Turkmenistan.

How many thermal power plants are there in Uzbekistan?

The Thermal Power Plants joint-stock company (JSC), a thermal power generation company, operates the majority of thermal power facilities in Uzbekistan, consisting of ten thermal power companies. As of 2021, Thermal Power Plants operates 11 thermal power plants, including co-generation 1 plants, with an installed capacity of 11 669 MW.

How much natural gas does Uzbekistan produce?

Uzbekistan is one of the world's largest natural gas producers. Its energy production amounted to 54.5 million tonnesof oil equivalent (Mtoe) in 2019. Energy production reached a record high of 56.7 Mtoe in 2008. This amount had decreased by 20% by 2015, mainly due to the global economic crisis and a decline in natural gas reserves.

Uzbekistan is also diversifying its energy mix by investing in renewable sources like solar and wind energy, driven by favorable investment conditions and technological advancements. This shift aims to reduce reliance on natural gas and promote environmental sustainability. The consumption from renewables and other sources
