

How secure is Uzbekistan's energy supply?

Uzbekistan's fuel/energy source security is becoming fragile, as the demand for the country's natural gas resources, the main energy source for electricity, is growing fast in other sectors, too. The plans to diversify into solar and wind power generation, possibly also nuclear power, appear well-founded also from the security of supply angle.

Does Uzbekistan have a solar power plant?

In Uzbekistan, HPP generation is counted as electricity produced from renewable energy sources (RESs). Despite the country's considerable solar energy potential, it has no industrial-scale solar power plants. Furthermore, as wind potential has not been studied sufficiently, there are also no industrial-scale wind farms.

How much energy does Uzbekistan produce?

Currently, renewable energy sources account for about 10% of the total volume of electricity production in the country. Uzbekistan is one of the world's largest natural gas producers, annually producing around 60bn m³, of which 35-40bn m³ are supplied by the Uzbekneftegaz joint-stock company. The domestic gas consumption is approximately 39bn m³.

Is Uzbekistan a good place to invest in solar energy?

China's Gezhouba Group and PowerChina are leading prospective solar projects. While progress on renewables is commendable, Uzbekistan is still heavily investing in the development of oil and gas and remains dependent on fossil gas to generate 85 percent of its electricity.

Should Uzbekistan reform its energy sector?

A tariff reform should be placed at the heart of Uzbekistan's efforts to reform its energy sector. Natural gas could be saved through improved efficiency, substituted with renewable energy in power generation and turned into higher-value-added petrochemicals.

Why is Uzbekistan's energy security so fragile?

It should also include indicators to measure progress. Uzbekistan's fuel/energy source security is becoming fragile, as the demand for the country's natural gas resources, the main energy source for electricity, is growing fast in other sectors, too.

Tashkent, Uzbekistan--(Newsfile Corp. - October 9, 2024) - NETA Auto, a leading player in the global new energy vehicle industry, has launched its globally popular model, NETA X, in Uzbekistan ...
