Pope Francis has gone fully electric for his next installment of the Pope-mobil, which was revealed at the Vatican on Wednesday. The new four-wheel-drive car is in line with the Pontiff's preaching on environmental protection and will have zero carbon emissions.

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km<sup>2</sup> and a population of around 825, the Vatican City in Rome is the smallest independent state in the world by both area and population.

The Vatican's commitment to green energy is further exemplified by its partnership with the utility company Acea, which now supplies the state with electricity exclusively from renewable sources.

Work has begun on the installation of charging stations for electric vehicles and plug-in electric vehicles in the Vatican car park (Petriano). Ten charging stations with 20 ports will be available for "fast" charging, while an additional charging station with two ports for "ultra-fast" charging, will be installed beside the entrance to ...

The Governorate of Vatican City State announces the launch of a series of energy-saving initiatives and strategies to safeguard the environment in the framework of the Pope's *Laudato si'* and *Laudate Deum*, including introducing a state car fleet to reduce CO<sub>2</sub> emissions through a partnership with the Volkswagen Group.
