

How will a solar plant benefit the Vatican?

The Pope has given full authority to two special Commissioners to supervise the plant's construction, ensuring that the project is carried out efficiently and effectively. The energy generated by this solar plant will cover all the Vatican's energy needs, eliminating dependence on non-renewable energy sources.

Does the Vatican need a solar plant?

The implementation of a solar plant not only improves the Vatican's environmental sustainability, but also offers economic and social benefits. By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many.

Why did Pope Francis build a solar plant in Rome?

Pope Francis' decision to construct a solar plant on the outskirts of Rome is a tangible manifestation of his commitment to sustainability and the fight against climate change. Not only will this initiative provide renewable energy to the Vatican, but it will also establish a standard for other institutions around the world.

Where is Vatican Radio's New solar power plant located?

The plant will be located in Santa Maria di Galeria, some 11 kilometers from Rome, where Vatican Radio's broadcasting station is located. Not only will this project generate renewable electricity, but it will also be integrated with the land's agricultural needs, combining modern technology with sustainable practices.

Why did Pope Francis embrace solar power?

In *Fratello Sole*, Pope Francis roots the decision to embrace solar power in his own invitation "to all mankind," in the encyclical *Laudato si'*, to make lifestyle changes to counter global warming and the "pervasive" use of fossil fuels.

Can the Vatican save on light?

By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many. The use of solar energy also improves the State's energy efficiency, enabling a more responsible and sustainable light consumption.

Vatican City - Photo by DAVID ILIFF. License CC BY-SA 3.0. There's no country anywhere on Earth that's entirely powered by renewable energy every day, but that's soon to change.

Spring Weather in Vatican City. Daily high temperatures increase by 20°F, from 58°F to 78°F, rarely falling below 51°F or exceeding 86°F. Daily low temperatures increase by 17°F, from 39°F to 55°F, rarely falling below 30°F or exceeding 61°F. For reference, on August 5, the hottest day of the year, temperatures in Vatican typically range from 65°F to 89°F, while on ...

Pope Francis has announced plans for the Vatican City to go solar through his latest motu proprio, *Fratello Sole*, or Brother Sun. The pope has delegated Vatican governing bodies to work with the Italian government to build an agrivoltaics system in the lands of Santa Maria di Galeria, located outside of Rome and an extra-territory of Vatican City.

News from the 200+ countries around the world without any US related news, which would otherwise swamp it due to the US-centric nature the bulk of the reddit audience. Many of the submissions will be collected from the best of the worldnews, science, technology and environment subreddits and re-submitted so they're easily viewed in one place.

Pope Francis has initiated the construction of an agrivoltaic plant within the extraterritorial area of Santa Maria di Galeria to provide energy for Vatican City. In his Apostolic Letter titled "Fratello Sole" (Brother Sun), the Pontiff emphasizes the critical role of solar energy in addressing environmental challenges, echoing themes from ...
