

Uzbekistan had a total primary energy supply (TPES) of 48.28 Mtoe in 2012. Electricity consumption was 47.80 TWh. The majority of primary energy came from fossil fuels, with natural gas, coal and oil the main sources. Hydroelectricity, the only significant renewable source in the country, accounted for about 2% of the primary energy supply. Natural gas is the source for 73.8% of electricity production, followed by hydroelectricity with 21.4%.

The European Bank for Reconstruction and Development (EBRD) is helping Uzbekistan to further decrease its reliance on carbon-intensive thermal-power generation and will facilitate the country's transition ...

Uzbekistan had a total primary energy supply of 48.28 Mtoe in 2012. [1] Electricity consumption was 47.80 TWh. The majority of primary energy came from fossil fuels, with natural gas, coal and oil the main sources. Hydroelectricity, the only significant renewable source in the country, accounted for about 2% of the primary energy supply.

As a result, Uzbekistan released a pilot energy balance in 2019 following the United Nations Statistics Division's International Recommendations for Energy Statistics guidelines. Increasing amounts of energy data are also being published in the energy section of the statistics website in several user-friendly formats.

Uzbekistan relied on fossil fuels for 93% of its electricity in 2022. Its emissions per capita were above the global average. Uzbekistan's largest source of clean electricity is hydro (6%). Its share of wind and solar is less than 1% and is below the global average (13%) as well as its neighbour Kazakhstan (5% in 2023).

International Roundtable on "Accelerating Renewable Energy Development for Clean Energy Transition in Uzbekistan" Jointly Organized by the Government of Uzbekistan, European Bank for Reconstruction and Development (EBRD) and World Bank Group (WBG)

2 ???&#0183; On December 13, President Shavkat Mirziyoyev marked a historic moment in Uzbekistan's energy sector by announcing the launch of 18 new energy projects worth \$3.7bn. These include solar and wind power plants in Bukhara, Navoi, Namangan, and Tashkent regions, totaling nearly 2.3 GW of capacity. For the first time in Uzbekistan, large-scale 300 ...

Renewable energy presents a formidable opportunity for Uzbekistan to combat poverty while promoting sustainable development. By investing in renewable technologies, Uzbekistan could stimulate economic growth, create jobs ...

The Central Asia republic of Uzbekistan is well endowed with energy resources, yet its energy system presents some critical problems in terms of sustainability, security and affordability. Uzbekistan is the most populated country in the region, and therefore population growth, economic development and urbanization are likely to further strain ...
