

What is energy in Algeria?

Energy in Algeria refers to energy and electricity production, consumption, and import in Algeria. The country had a primary energy use of 462 TWh in 2009 with a consumption of 13 TWh per million persons. Algeria is an OPEC country.

Who owns Algeria's oil refineries?

Sonatrach, Algeria's state-owned oil company, solely owns and operates Algeria's refineries, which were built between 1960's and 1980's.

Could the business and Investors Group and Algeria's cluster energy Solaire collaborate?

The Business and Investors Group and Algeria's Cluster Energie Solaire could serve as prime platforms for such collaboration. The IRENA Coalition for Action brings together leading renewable energy players from around the world.

What type of oil does Algeria produce?

Algeria's oil fields produce high quality, light, sweet crude oil with a very low sulfur content. The country's main crude oil grade is the Sahara blend (API gravity of 46.0 and a sulfur content of 0.10%), which is a blend of crude oils produced at fields in the Hassi Messaoud region.³ Algeria's largest oil fields are mature.

Does Algeria have a nuclear power plant?

Algeria has operated research reactors at Draria and Oussera since 1995. It has signed nuclear cooperation agreements with Russia (2007), the United States (2007), and China (2008), and has discussed nuclear cooperation with France. Algeria is a member of OPEC but does not currently have a functional nuclear power plant. Since 1995, Algeria has operated research reactors at Draria and Oussera.
