Energy vortices occur all over the planet. You can find healing, electromagnetically charged terrain or man-made vortices in your local area or state. Natural ones occur as waterfalls, volcanoes, mountains, wooded areas, deserts, or lakes. Look for interesting formations that provide the funneling effect (like the twisted tree).

An energy vortex is a specific location on Earth which acts as a swirling center of energy, containing more earthly energy than any normal place would. One common belief in regard to energy vortices is that they exist at the intersections of ley lines or the random lines of natural energy that make up the Earth's electromagnetic field.

Within Vortex Energy he successfully completed the exit of an operating portfolio of c. 460 MW onshore wind assets in France, Spain, Portugal, and Belgium to funds managed by J.P. Morgan. In addition, he has successfully completed the sale of a controlling stake in a 365 MW operating solar portfolio to Tanaga Nacional in the UK, delivering ...

Developing the Future of Salt Mining, Hydrogen / Energy Storage Company Focus Vortex Energy is focused on leveraging its assets for salt mining and energy.
