

The NGO Western Sahara Resource Watch reported that up to 80 percent of the land earmarked by Morocco for green hydrogen production lies in the Western Sahara. For the time being, the official EU position bars the EU ...

Western Sahara is very sunny and surprisingly windy - a natural renewable energy powerhouse. Morocco has exploited these resources by building three large wind farms (five more are planned)...

This ambitious project is estimated to cost around MAD 21 billion (\$2.1 billion) and will be led by both local and foreign private investors, as stated by an unnamed energy ministry official.

The energy produced on occupied land increases Morocco's dependency on the territory that it occupies. As such, the projects fundamentally undermine the UN peace efforts in Western Sahara directed towards allowing the expression of the right to self-determination of the Saharawi people.

In a July letter celebrating the 25th anniversary of Moroccan King Mohammed VI's coronation, French President Emmanuel Macron announced a change in France's policy regarding the long-running Western Sahara dispute, declaring that "the present and future of Western Sahara lie within the framework of Moroccan sovereignty." That followed similar ...

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign ...

The NGO Western Sahara Resource Watch reported that up to 80 percent of the land earmarked by Morocco for green hydrogen production lies in the Western Sahara. For the time being, the official EU position bars the EU from purchasing energy originating in ...

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign of solar and wind energy potential.

"Morocco to Double West Sahara Green Power Output for World Cup", 16 October 2024 The government has set a 2027 deadline to build 1.4 gigawatts of new wind and solar capacity in the region... The projects are likely to cost about 21 billion dirhams (\$2.1 billion) and will be led by local and foreign private investors, according to the official

The UN regards Western Sahara as a non-self-governing-territory without an administering power in place.

The International Court of Justice has found Morocco's claim to the territory null-and-void, findings echoed in a body of EU ...

More than eight years have passed since Siemens first issued a press release regarding a contract for construction of energy infrastructure in occupied Western Sahara. The company then described the territory as &quot;Southern Morocco&quot;. Now, it has done that again. In a press release [or download] of early September, Siemens Gamesa Renewable Energy (SGRE) announced that ...

Morocco drives renewable energy projects in Western Sahara. Morocco has claimed authority over Western Sahara since 1975, but the UN does not recognise Moroccan control, calling Western Sahara a "non-self-governing territory." The UN has called for a referendum to decide the region's future.

The energy produced on occupied land increases Morocco's dependency on the territory that it occupies. As such, the projects fundamentally undermine the UN peace efforts in Western Sahara directed towards allowing ...

Western Sahara Resource Watch (WSRW) is privileged to be writing to you. We are writing in relation to the announcement that Envision Energy has been contracted to supply wind turbines to a wind farm in Dakhla. A multitude of Moroccan and international news outlets have reported that your company will provide 60 MW wind turbines (EN171-5MW ...
