

What is the Western Solar Plan?

"The updated Western Solar Plan is a responsible, pragmatic strategy for developing solar energy on our nation's public lands that supports national clean energy goals and long-term national energy security," said BLM Director Tracy Stone-Manning.

What does the new Western Solar Plan mean for public lands?

"Simply put, the updated Western Solar Plan will create the foundation for solar development and conservation on public lands into the future." Daniel-Davis and BLM Director Tracy Stone-Manning also announced during the call that several proposed large-scale solar energy projects had reached regulatory permitting milestones.

What will the proposed updated Western Solar Plan Do?

The proposed updated Western Solar Plan identifies areas for potential solar development on BLM-managed public lands across the West. It expands the planning area from the original six states (AZ, CA, CO, NV, NM, UT) to include five additional states (ID, MT, OR, WA, and WY).

How many acres of public lands are needed for Western Solar Plan?

In considering updates to the Western Solar Plan, the BLM worked closely with the Department of Energy's National Renewable Energy Laboratory to examine forecasts for national clean energy needs and determined that approximately 700,000 acres of public lands would be needed to meet those goals.

What's new in the 2012 Western Solar Plan?

The plan updates and expands the original 2012 Western Solar Plan in order to reflect changes in technology and meet the higher demand for solar energy development. This plan analyzes five additional western states (Idaho, Montana, Oregon, Washington, and Wyoming), in addition to the six states analyzed in the original plan.

Why is the BLM applying the Western Solar Plan?

For applications still in the early stages, BLM is applying the updated Western Solar Plan to reflect the BLM's commitment to ensuring that land use decisions reflect the most current information and standards and promote the sustainable management of public lands.
