

What should I pay attention to when buying photovoltaic panels

Are residential solar panels a good option?

Throughout the country, residential solar panels have become an increasingly popular option for generating energy for homes. The rising costs of energy across the US, along with falling prices for solar panels, and excellent federal tax incentives, have made solar power a much more attainable and economically beneficial option for homeowners.

Should you go solar if your home is not suitable for solar?

If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program. By going solar, you can play an active role in achieving the nation's goal of a carbon-free electricity sector by 2035. For more information, visit the Homeowner's Guide to Going Solar.

Should you buy or lease solar panels?

But there are pros and cons to all of the buying panels (with a loan or cash) and leasing them. In general: Solar leases can provide immediate energy cost savings, but are typically less lucrative than ownership in the long term and come with a unique set of complications. Brian Lynch's advice:

How do I determine my home's solar rooftop potential?

Determine your home's solar potential. Aside from your roof's condition, your home's solar rooftop potential depends on your geographic location, the position of your home in relation to the sun, how much shade you have, and the PV system you and your installer choose.

Should you sell a home with solar panels?

Some homeowners opt to take advantage of selling a home with solar panels, as this increases the value of the home and can be a selling point for many buyers. For those who leased the solar panels, simply call the company to have them transferred to a new location, the new homeowners, or cancel the plan altogether.

What if my home is not suitable for rooftop solar?

The National Renewable Energy Laboratory's SolarTRACE tool can give you a general idea of how long it may take to complete the permitting, inspection, and interconnection process in your jurisdiction. If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program.
