

# Which floor can I live in to install photovoltaic panels

Where can a ground-mounted solar panel be installed?

Ground-mounted solar panels can be installed anywhere with good sun exposure and sufficient amounts of open space - a minimum of 350 square feet is usually required. Ground-mounted solar panels are also known as backyard solar panels, free-standing solar panels, and ground-mount PV systems.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

How to choose a solar panel installation site?

Prioritize ease of maintenance when selecting your solar panel installation site. The panels should be accessible for regular cleaning, as dust, bird droppings, snow can accumulate and reduce their effectiveness. -- Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member Wondering how to install solar panels?

Can you put solar panels on a roof?

Ground mounts are more common for certain types of solar systems, like off-grid setups. But they can be used by anyone if they have the space! There are other options if your roof isn't suitable for solar panels; you can also consider a solar carport, a solar patio, or even a solar tree!

Are ground-mounted solar panels a good alternative to rooftop solar?

Ground-mounted solar panels are a great alternative for customers who want solar - but don't have a roof that's suitable for them. On top of being an alternative to rooftop solar, ground-mounted solar systems can be used on farms, in your garden, and more!

Can you use ground-mounted solar panels in off-grid systems?

Yes, you can use ground-mounted solar panels in off-grid systems -- they can even qualify for the federal tax credit. You'll need a solar battery to store the electricity, just as with any off-grid solar setup. How much can solar trackers increase the efficiency of my ground-mounted solar panels?
