

Who are the bosses who install photovoltaic panels

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

What does a solar installer do?

Solar photovoltaic (PV) installers assemble, set up, and maintain rooftop or other systems that convert sunlight into energy. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid. Installers also must travel to jobsites.

How do I choose a solar installer?

Credibility and Expertise- Seek out installers who have experience installing solar equipment and are knowledgeable about all aspects of the process. A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.
