We picked Tesla Solar as the best solar installation company for availability, with a score of 4.6 out of five stars. The company was established in 2009 and has its products ready for installation at third-party solar companies across the country. Mobile App? Free Energy Consultation? Our pick for best customer satisfaction is Blue Raven Solar.

Does Home Depot install solar panels?

Every year, The Home Depot helps thousands of homeowners install solar power systems that will reduce the cost of their monthly electricity bills. Transitioning to solar power requires custom designers and experienced contractors who can work with you on the installation of your solar panels from start to finish.

Can solar panels be installed on a roof?

To get the most out of your system, ensure your home can accommodate solar panels before installing them on your roof. Your roof's shading, its orientation and angle towards the sun, and its age all contribute to its potential to generate solar energy. In a perfect world, your panels will face south and tilt between 15 and 40 degrees.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).
