

# Who is responsible for the hail damage to photovoltaic panels

Do solar panels cover hail damage?

Not all solar panel warranties cover hail damage. Most homeowners' insurance provides hail coverage for solar panels installed on rooftops. High-quality solar panels are very resistant to hail damage and have been tested to withstand such severe weather events. What is hail? Hail consists of solid ice, which falls from the sky like rain or snow.

How common is hail damage to solar panels?

According to a study conducted by the National Renewable Energy Laboratory (NREL), the probability of hail damage to a PV system is below 0.05% (or less than one in every 2,500 installations). [LEARN: How long do solar panels last?](#)

Can hail damage solar modules?

Yes, hail can damage solar modules. Existing testing is inadequate, and there is more risk than coverage. Hailstorms are not a new risk for solar developers, insurers, or module suppliers.

How can I protect my solar panels from hail damage?

Although there's not much you can do to stop Mother Nature, there are a few things you can do to protect your solar panels from potential hail damage before and after your installation. For starters, get a professional to install your solar panels and ask to see the technical specifications and ratings associated with the equipment they use.

What happens to solar panels after a hailstorm?

An inspection in the aftermath of a severe hailstorm can check for damage to the solar panels themselves, their frames, and the racking system, as well as remove any debris that may have fallen on the array during the inclement weather event.

Can solar panels be installed in a hail storm?

Hail yes! You should consider installing solar panels on your home even if you live in an area that experiences hail storms. However, if you live in Texas, Colorado, Nebraska, Minnesota, or Illinois you should take extra precautions in protecting your solar panels.
