We have space and such a project will not prevent other activities or projects. Greenland as attractive wind resources and ample access to clean water. Clients are based internationally and Greenland will benefit from new employment and export revenues. This is a win/win project- from the climate to the treasure."

The Mount Storm Wind Farm is located 120 miles west of Washington, D.C. in Grant County, West Virginia. The wind farm includes 132 Gamesa G80 wind turbines each with a two megawatt (MW) capacity along 12 miles of the Allegheny Front. Construction of the wind farm began in 2006 and the project is now fully operational, generating up to 264 MW of electricity for the mid ...

According to Palle Christiansen, CEO of Anori, Greenland is ideally suited for the project as it offers attractive wind resources and ample access to clean water required for the operation of the floating production vessel. In addition, there is ample space to build the wind farm without concerns about competing for space with other projects.
