DR Congo, one of the poorest countries in the world, is banking on water to help overcome energy poverty. It plans to build a third hydropower plant at the existing Grand Inga Dam project...

Indian renewables developer and builder Soleos Energy and a partner specialising in electrical engineering, namely Melci Holdings, are getting ready to commence construction of a 200-MW solar photovoltaic (PV) plant in ...

Join the World Energy Council. Do you want to get involved with the world's most dynamic energy organisation? Our globally networked energy-plus community aims to increase social and environmental benefits, deliver "new" solutions, and forge common sense to close the implementation gap and activate road building communities.

Democratic Republic of Congo: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The Democratic Republic of the Congo has reserves of petroleum, natural gas, coal, and a potential hydroelectric power generating capacity of around 100,000 MW. The Inga Dam on the Congo River has the potential capacity to generate 40,000 to 45,000 MW of electric power, sufficient to supply the electricity needs of the whole Southern Africa ...

Provide a platform for institutionalised and multi-stakeholder energy focused dialogue that incorporates all sectors across the energy spectrum and engages the energy plus community. Be the authoritative voice at a local level on energy using the Council's fact based, impartial insights, tools, and best practices to drive the policy debate ...
