

Will Xinjiang & China produce solar panels?

Xinjiang will produce about half of the polysilicon in these panels, based on BNEF projections, and China will account for more than 80% of the overall supply. But consumers can't track the provenance of their panels, since raw materials from multiple factories mix together along the solar supply chain.

Should China move supply chains out of Xinjiang?

The same organization has urged members to move supply chains out of Xinjiang. Units of Chinese solar giants Longi Green Energy Technology, JA Solar Technology, and JinkoSolar Holding also signed the document; all three had multiyear contracts to buy polysilicon from Xinjiang-based manufacturers at the time.

Are Xinjiang's polysilicon refineries linked to forced labor?

Companies and governments are also growing uneasy about their reliance on a region rife with allegations of human-rights abuses. Three owners of Xinjiang's polysilicon refineries have been linked to a state-run employment program that, according to some foreign governments and academics, may at times amount to forced labor.

Are Xinjiang's polysilicon refineries a state-run employment program?

Three owners of Xinjiang's polysilicon refineries have been linked to a state-run employment program that, according to some foreign governments and academics, may at times amount to forced labor. China denies such accusations and recently insisted that journalists and diplomats are free to go see for themselves.
