Yemen had 2.349 million Internet users in 2011, up from 295,232 in 2008, and 270,000 in 2006. [2] [3] These low numbers are attributed to the high cost of computer equipment and connections in combination with the population's low level of income, as well as to the restricted bandwidth available on Yemen's outdated telephone network. [2] There were 33,206 Internet hosts in 2012.
