Plus, our technicians fix iPhone damage, repair busted tablets & smartphones and install batteries in most cars and trucks.

Is zebra a viable alternative to lithium-ion batteries?

Despite the reduced capacity compared with lithium-ion batteries, the ZEBRA technology is applicable for stationary energy storage from solar power. The company operates a 540 kwh storage facility for solar cells on the roof of a shopping center, and produces over a million battery units per year from sustainable, non-toxic materials.

What is a zebra molten salt battery?

A ZEBRA molten salt battery. The ZEBRA battery is a type of rechargeable molten salt battery based on commonly available and low-cost materials - primarily nickel metal, the sodium and chloride from conventional table salt, as well as beta-alumina solid electrolyte.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

How many kilowatts does a zebra ED1 take to charge?

The ED1 ran on 13.2 kilowatt hours of sodium-nickel chloride Zebra batteries operating at 245 °C (473 °F). It is typically kept molten and ready for use because if allowed to "freeze" it takes twelve hours to reheat and charge.
