

During the fall of 2017 plans to make Åre into a testbed for green energy and smart grids were put into motion. The project, which is run by the company Clic Innovation, has several goals, the most important of which is to display a society that is 100% dependent on renewable energy.

During the fall of 2017 plans to make Åre into a testbed for green energy and smart grids were put into motion. The project, which is run by the company Clic Innovation, has several goals, ...

Composed by 3,360 Samsungs 18650 2600mah cells, all of them manufactured on May 2017, so basically new when I got them on December 2017. At the moment I'm building the wall cabinet for them that will be measuring 48" Wide x 72" Height x 8" Deep with an 11.1" touchscreen tablet on the front to show the...

With its location in the middle of the sea, awash in salty sea winds, the most hours of sunlight in the Nordic countries and a deep love of nature, it's no wonder that Åre has set its sights on ...

With its location in the middle of the sea, awash in salty sea winds, the most hours of sunlight in the Nordic countries and a deep love of nature, it's no wonder that Åre has set its sights on a future with power from nature's own green energy.
